

Part Ten

DATA DISSEMINATION

FCTC

WHO FRAMEWORK CONVENTION
ON TOBACCO CONTROL

Article 20: Research, surveillance and exchange of information

Parties shall ... cooperate with the World Health Organization in the development of general guidelines or procedures for defining the collection, analysis and dissemination of tobacco-related surveillance data.

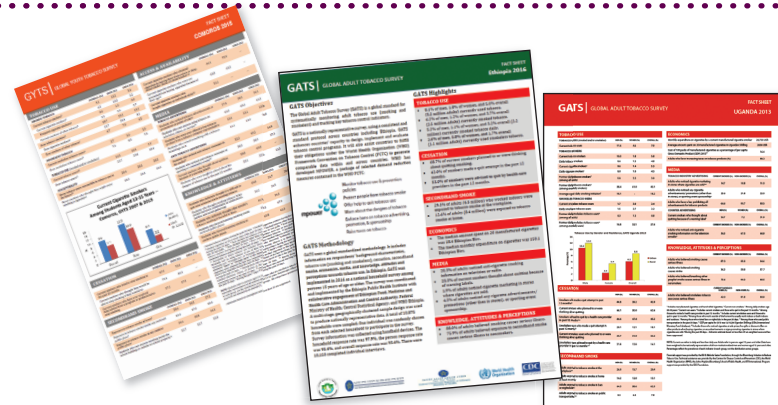

33 GTSSData: An Interactive Application

GTSSData houses and displays data from GTSS surveys conducted around the world, including GATS and GYTS. GTSSData helps countries monitor tobacco use, provides data that can be used to guide national

tobacco prevention and control programs, and promotes within and cross-country comparisons of tobacco use and key tobacco control indicators.

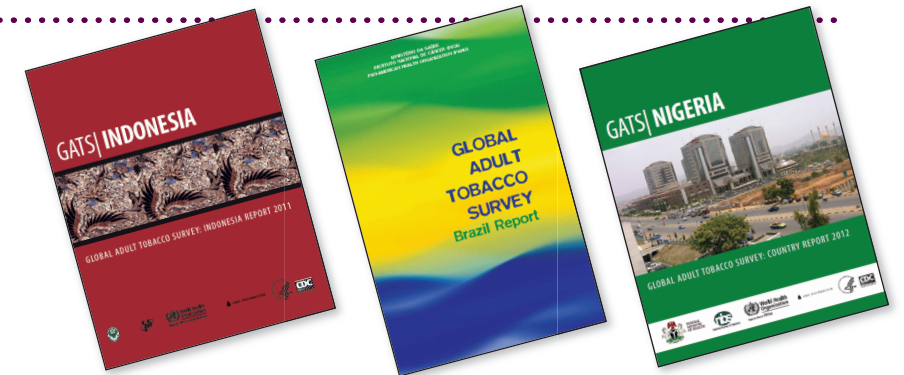

FACT SHEETS

Fact sheets provide data highlights and key messages from survey results.

COUNTRY REPORTS

Country reports document in detail survey methods, results, and public health practice considerations.

DATASETS

All public-use data sets are publicly available (with the exception of any confidential information), along with their corresponding codebook. GATS and GYTS public-use data sets are typically available 1 year after the initial release of the data.

Data available on GTSSData can be explored by country, region, survey, topic, and MPOWER measure, and displayed using a map, chart, or table.

SURVEY DOCUMENTS

Survey documents include resources, protocols, and manuals for GATS and GYTS.

PUBLICATIONS

Various reports, articles, and publications that report GTSS data are available to download.

PARTNERS

A list of GTSS partners is provided for easy access to partner websites.
